

SG CHESS CLUB @ P. S. 94Q

Chess is increasingly becoming the game of choice for educational facilities across the world. If you want your kids to get away from all the electronic devices at home, studies have shown that chess improves children's concentration and logical thinking which help with reading and math skills as well as decision making, sportsmanship and emotional intelligence.

The SG faculty creates an environment where students will learn and improve their game in an engaging and enjoyable atmosphere. Coach Jonathan has been teaching chess at schools for more than 15 years. Classes feature instruction, tournament play and team matches. Players new to chess are taught the rules, notation, and basic strategies. Medium players develop a repertory of game strategies for the opening, middle game and endgame.
